

YEAR 5

HOME  
LEARNING  
PACK

Each day there is an English and Maths activity for you to have a go at. As well as this, below are some useful websites and a few ideas for free choice projects that you may want to use.

### Other activities and online resources that are useful:

#### BBC Bitesize:

<https://www.bbc.co.uk/bitesize/levels/zbr9wmn>

This website is great there is lots of useful information, videos and quizzes. Why not spend a bit of time each day on this website? You may want to go over something that you learnt about in year 4 linked to English and Maths or even start to learn about the Vikings in preparation for our first topic in year 5.

#### Oak National Academy:

<https://www.thenational.academy/>

Again this website is great. There are full sequences of lessons that you can work through. There is also a summer classroom which you may choose to have a go at. Why not choose your favourite subject and have a go at some of the lessons? Alternatively, you could choose to revise something that you found tricky in year 4.

#### Primary Homework:

<http://www.primaryhomeworkhelp.co.uk/>

Again, there is a huge back of resources on this website. You could use it to go over spellings or punctuation, maths or even science. You will find worksheets and games to have a go at.

#### Free choice projects:

In year 5, our first topic is Vikings. Why not research and find out a bit about the Vikings and create a leaflet or poster? In Science, we begin by finding out all about properties and changes of materials. This is maybe something that you would like to find out a bit more about and create a poster showing what you have learnt.
